# SUSTAINABLE WATER FREE SANITATION – FOR OVER 25 YEARS

Cinderella Eco Group is a family owned company located in Midsund, Molde municipality, with deep roots in the beautiful Norwegian fjord landscape.

The company is part of Sjøvik Group, which has operated from Sjøvika in Midsund since 1903. Odd Kjell Sjøvik, chairman, grandson of Sjøvik's founder and father of the current CEO of Cinderella Eco Group, developed the prototype and launched the adventure, first with production in Sweden and shortly after from Norway, in the municipality of Lyngen above the Arctic Circle. Here we produce every toilet we sell from this location and in 2022 we opened a brand new factory on the neighboring plot.

More than 25 years ago, the first Cinderella incineration toilet saw the light of day and the demand for our water-free, ecological, non-sewered sanitation solutions has spread internationally with 60 % of our production for export markets. We're proud to say that all of our toilets are Made in Norway.

Until 2012, Cinderella incineration toilets were only available in the Nordic area, mainly to the leisure market and cottage owners. Today, we have a presence on all continents, not only for the private sector but for professional sectors such as aquaculture, crane manufacturers, railway companies, the mining and construction industries and to relief organizations.

New factory in Lyngen, above the Arctic Circle. Photo: Frode Hansen

With our model adapted for transportation such as narrow boats, caravans and motor homes, we have also created an innovative solution for those who want toilet comfort while on the go.

At Cinderella Eco Group, we believe in creativity and innovative design and we are concerned about sustainability and our environment. Toilet solutions that do not need water and sewage can provide

answers to the serious challenges to health and to our society. With the help of modern technology and committed employees, we set the standard for the optimal trade in first-class toilet systems both for our customers and to be able to make a difference on a global scale.

**Cinderella is the natural choice for those who place high demands on quality and functionality – when nature calls.**

## OUR COMMITMENT TO OUR ENVIRONMENT AND OUR SOCIETY

At Cinderella Eco Group we design ecological solutions for the total management of toilet waste. In a world where water shortages and energy resources characterize areas with strong urbanization and population density, health challenges arise through failing or lacking sanitation. This is where Cinderella's incineration toilets can be an environmentally friendly alternative.

The UN's Sustainable Development Goals provide guidelines to important dimensions such as health, access to water and sanitation, innovation and responsible consumption, education and job creation as well as the preservation of life on earth and in water. Through our corporate social responsibility for the non-profit organization North South Partnership Aid, we are committed to contributing to the future of orphaned and vulnerable children in Kenya and Ethiopia. We donate our water-free

incineration toilets to children's villages that need safe sanitation, contributing to ensuring that precious water resources are used exclusively for hygiene, drinking and agriculture, not for flushing.

At Cinderella, we develop environmentally friendly waste solutions that do not require access to water and can be adapted to different needs. Our incineration technology uses energy sources such as LPG gas or electricity and where electricity can be harnessed from wind power or solar. The result of the process is only a minimal amount of bacteria-free ash that can be safely disposed of in ordinary household waste bins. In this way, we help to limit our ecological footprint, without the consumption of precious resources and without infectious or polluting emissions.

## CERTIFICATES AND APPROVALS

Cinderella Incineration Toilets are designed with the highest quality materials to meet the highest standards and operational reliability.

Our toilets have defined and set the standard for incinerating toilets since 1997 and we work actively to ensure that incineration technology is recognized worldwide as an environmentally friendly, water-free, total waste handling solution.

Cinderella Incineration Toilets meet both national and international certifications and regulatory demands and we work with a number of accredited companies to assure our customers that safety and quality are maintained at all times. Through careful analysis, Cinderella Eco Group has chosen the agencies and testing laboratories that we believe have the best expertise and

experience to provide a reliable and credible approval for our clients.

## WHAT IS AN INCINERATION TOILET?

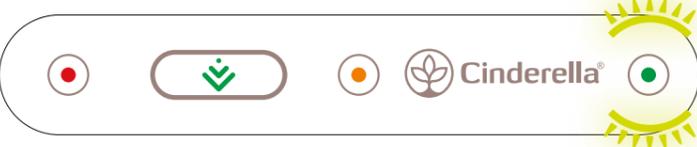

An incineration toilet is a water-free toilet where bio waste products are burned at high temperatures to a minimum amount of ash, resulting in a teacup for four people after one week's use. The waste is safely incinerated in a closed incineration chamber, and the pollution-free gases from the incineration process are discharged through a separate exhaust pipe.

Incinerating toilets are a total waste solution, which means they get rid of all the waste. There are no additional processes or messy emptying routines, such as other toilet systems require. The solution is odorless and hygienic. The bacteria-free ash is completely free of all pathogens and can be discarded

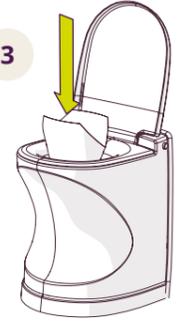

with the household garbage. Incineration toilets are a popular toilet alternative since they don't require water or expensive sewage connection. With an incineration toilet it's possible to achieve almost the same toilet comfort as flushing toilets, without the considerable costs associated with sewage systems.

Cinderella Incineration Toilets are the market leader in Europe and have been produced since 1997. All our toilets are manufactured in Norway to the highest quality and reliability standards. Our products are certified and approved according to current regulatory demands in each country we operate, which is a security for all our customers.

## USING THE CINDERELLA TRAVEL

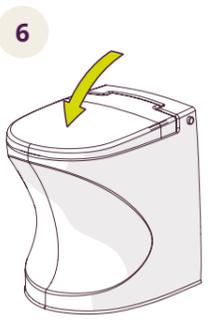

- 

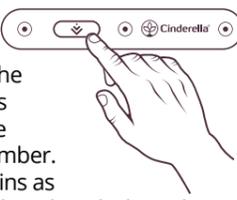

Make sure the power supply is connected. Make sure the propane is connected. Check that the green light on the control panel is lit, indicating the unit is ready for use.
- 

Lift up the lid and the seat. The red light flashes and the green light is illuminated. The exhaust fan will start automatically.
- 

Place a bowl liner in the bowl. Use a new bowl liner for every visit.
- 

Lower the seat. The toilet is ready for use.
- 

Use the toilet as usual. If little waste is produced, it may be helpful to pour some water into the bowl to add weight.
- 

Close the toilet lid.
- 

Push the "Start" button to drop the bowl liner and its contents into the incineration chamber. Incineration begins as soon as the hatch is closed. The toilet is now ready for the next user.
- 

A constant yellow light will display during active incineration. The toilet may be used at any point. This will temporarily interrupt incineration.

ENERGY SOURCE  
LPG GAS

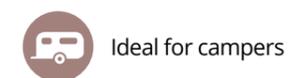

# Travel

IDEAL FOR RECREATIONAL  
VEHICLES, NARROW BOATS,  
AND CHANNEL BOATS

Many are familiar with Cinderella Incineration Toilets designed for transportation options such as narrow boats, channel boats and recreational vehicles such as campers and mobile homes, under the name Motion. Cinderella Travel represents a totally new way to handle waste, easily, without the hassle of emptying in designated areas. The toilets are designed and produced in Norway, known for longevity and high quality with excellent capacity and sustainable, ecological design – without polluting outcomes. Cinderella Travel provides a hygienic and easy way to dispose of toilet waste safely, either on the road or on the water.

Cinderella Travel was first launched on the market as "Cinderella Motion" in 2013 as a further product development from the popular incineration toilets provided by Cinderella Eco Group, which have been available since 1997. Environmentally friendly Travel does not require electrical power and uses only LPG gas and 12V control power.

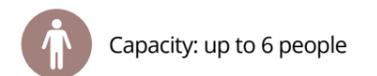

Ideal for campers

Energy source: LPG gas

Recreational vehicles

Capacity: up to 6 people

Narrow boats

**ENERGY SOURCE**  
LPG GAS

- Complete waste handling solution, incinerates all waste
- Does not use water
- No need for tanks or containers
- No need for frost protection

your local dealer

**DON'T FORGET THE BOWL LINER!**  
The bowl liners transport toilet waste to the bottom of the toilet for incineration and are an important accessory to keep your toilet clean and hygienic.

ADAPTED TO  
CINDERELLA  
TRAVEL

**PRACTICAL LIFTING MECHANISM**  
The Cinderella Travel is equipped with a practical lifting mechanism which lifts the outer shell in a simple motion. The mechanism makes for easy access to the ash tray for emptying.

## INSTALLING CINDERELLA TRAVEL

### FACTORY INSTALLED

Cinderella Travel is a product that requires skill in order to be installed correctly, which is why this is performed from the manufacturers at their factory. It is important that the Travel is installed correctly and in accordance with installation instructions. We work with large and small manufacturers, and the list of providers is constantly expanding.

### RETROFITTING

Cinderella Travel can also be retrofitted into existing Caravans, RV's, narrow boats and channel boats. This will require replacing old toilets, applies access to 12V control power and LPG Gas in addition to ensuring adequate air supply to the toilet. You must also install an exhaust pipe from the toilet that goes up beyond the roof. On our website, you will find an overview of which dealers are retrofitting in your area.

### TECHNICAL SPECIFICATIONS:

- Height: 540 mm / Seat height: 490 mm
- Width: 390 mm
- Depth: 590 mm
- Weight: 20 kg
- Capacity: Up to 6 people
- Standby Power Consumption: 0.005 Amp
- Power consumption (incineration): 1.3 Amp
- Gas consumption: 140-180 g per incineration
- Exhaust fan: 12V DC
- Gas: Propane (30 mbar pressure)
- Electrical power supply: 12V DC / 4 Amp (11-14.4V)
- Maximum burner effect: 2,87 kW

### OTHER FEATURES TRAVEL:

- Can replace most traditional toilet solutions for motor homes/caravans
- No need for tanks or containers, everything is emptied from the inside
- Produces little waste, end product is clean ash
- Environmentally friendly solution
- A high quality product made in Norway
- Easy to use and childproof
- Comfortable indoor climate, no smell
- DBI approved and CE-marked
- High capacity, approx. 70 toilet visits before emptying
- 3-year warranty

### THIS IS INCLUDED WITH THE TRAVEL:

- Travel incineration toilet
- User manual and Installation manuals
- 100 pcs Bowl liners
- Roof feed through flange
- Docking frame
- Chimney top
- Winter extension
- Control panel
- Mounting screws

### YOU ALSO NEED:

**CINDERELLA TRAVEL (MOTION) ORIGINAL INSTALLATION KIT**  
Installation kit containing exhaust pipe, Insulation sleeve for exhaust pipe, hose clamps, Air intake pipes, Connection for exhaust.

# INSTALLATION

## EXAMPLE OF INSTALLATION OF TRAVEL IN A RECREATIONAL VEHICLE:

-  **CHIMNEY TOP**  
Flue cap above the roof line
-  **ROOF FEED THROUGH FLANGE**
-  **VENTILATION PIPE**  
Installing ventilation exhaust
-  **INSULATION**  
Insulating ventilation pipes
-  **BUILT IN**  
Built in toilet and installation of ventilation pipe for exhaust
-  **PLACEMENT**  
Placement of the unit and adapting to technical installation demands (gas and 12V)
-  **INSPECTION HATCH**  
External inspection hatch
-  **AIR INTAKE**  
Inlet of air to a unit that is installed on the floor

### FOR CARAVANS, MOBILE HOMES AND NARROW BOATS:

An incineration toilet that is installed and maintained properly will work smoothly for many years. The most important criteria for a successful installation are the toilet's requirements for inlet of air and adequate ventilation to lead the exhaust gases from the incineration process out of the toilet room. In addition, as the toilet is dependent on propane and 12V power as energy sources, this must be provided in accordance with current regulations for the installation site. Cinderella Travel is delivered as a built-in toilet with an external control panel.

### AT THE MANUFACTURER:

The Cinderella Travel requires certified expertise for installation and is therefore mainly pre-installed by manufacturers of motor homes / caravans at the factory. It is important that the product is installed correctly, and in accordance with the manufacturer's instructions, and we continuously train and certify new dealers worldwide for this task

### AS REPLACEMENT TOILET:

In most cases, Cinderella Travel may be installed as a replacement toilet in existing caravans and recreational vehicles. In addition to the product itself, this will require the installation kit described below. Such replacement installation will require removal of the old toilet solution, installation of infrastructure for 12V power and gas, and sufficient air supply to the toilet must be secured. A waste gas pipe from the toilet has to be installed and led out over the roof, terminated with a chimney top suited for the purpose. This is included in the installation kit. **IMPORTANT: Such tasks must only be conducted by professionals, trained by Cinderella Eco Group. You will find more information about our dealers on our website, [www.cinderellaeco.com](http://www.cinderellaeco.com)**

**NEW 2023**

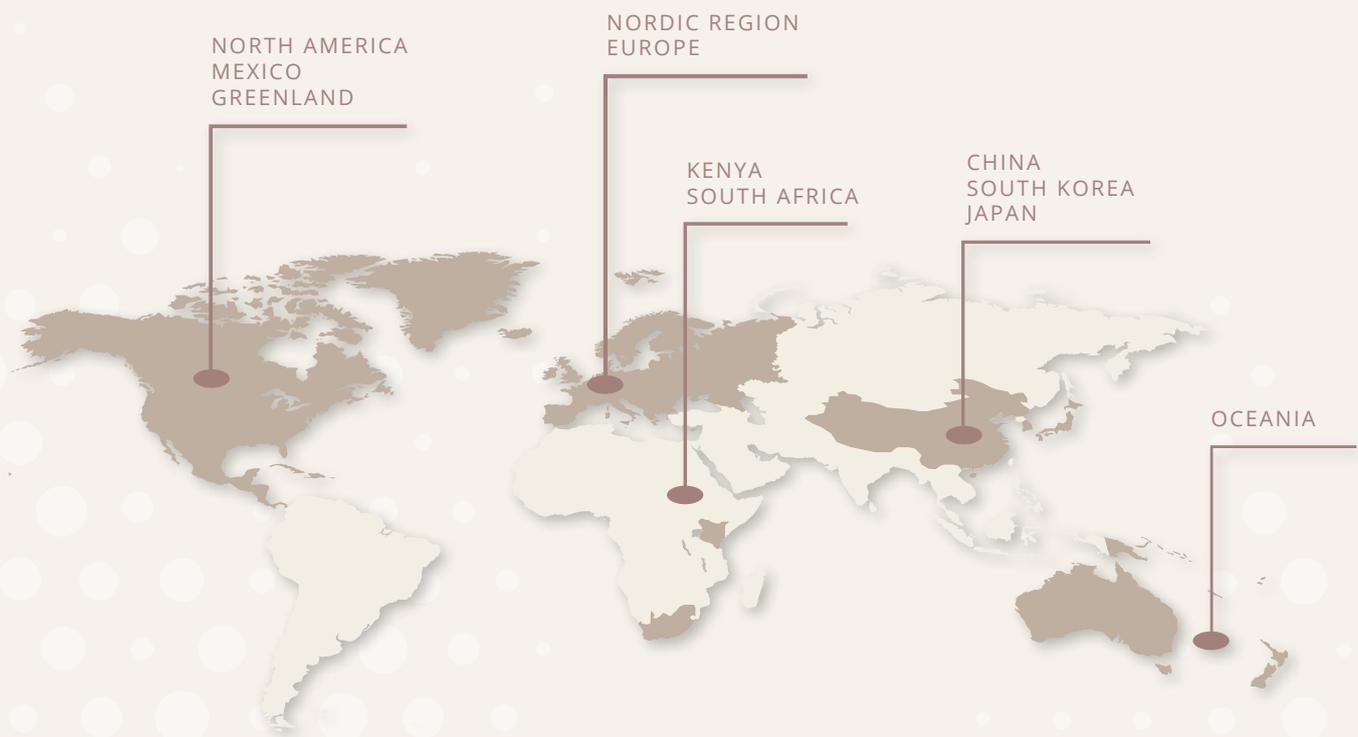

### CINDERELLA TRAVEL BUILD-IN-BOX

Simplifies the installation of Cinderella Travel. Pre-fabricated installation box for exhaust pipes and the toilet's installation parts.
